government is branded as treason. In these crucial times, Solidarity Youth Movement, Karnataka wants to prepare young minds to work for the benefit of all human beings, while fulfilling & upholding the great aspirations of our country. We want to develop values of freedom, equality, solidarity and social justice.

Promotion of Virtues and Eradication of Immoral Behaviour

Immorality, alcoholism and drug addiction is becoming a new common in our society. Youth are especially vulnerable to these addictions. According to one survey, nearly 75% youth drink alcohol before reaching the age of 21 years. This particular survey was conducted in Mumbai, Pune, Delhi, Kolkata and Rajasthan among thousands of youth aged around 16 to 20 years. It is estimated that 47% of people consume cigarettes while 20% of youth consume drugs. 83% of these addicted youth don't know how to get rid of this addiction. (This survey was conducted by St. Xavier's College, Mumbai and submitted to Narcotics control Bureau) This is really one of the burning issue that today's youth are experiencing. There is a need for sincere & collective efforts to get youth out of this evil. Solidarity Youth Movement, Karnataka is an attempt to create a holistic awareness along with various possible solutions in this regard. Similarly many virtues and noble acts need to be recognized and promoted to make our society a healthy society.

Wholesome Personality

A healthy mind in a healthy body – thus goes the maxim. There's an utmost need to provide all necessary training - physical, mental and spiritual - dedicated to the overall development of youth. A wholesome environment encompassing all these dimensions must be created among the youth. This can be achieved only with firm belief in Almighty God, His last Prophet and the day of Judgment and a steadfast struggle.

Environment - Our Obligations

Similarly, one of Solidarity Youth Movement's goals is to strive for environmental protection and sustainable development. Through the concept of "Imaratul Ard", Islam teaches that proper caretaking of Earth is a part of our religious duty. In this regard, youth need to come forward and stop the ongoing evil interference & exploitation of natural resources in the environment. We owe this to our future generations.

Solidarity invites you

Thus all youth who are ready to constantly strive with us in this struggle to achieve justice, harmony, peace & empowerment for all and in developing a society of morally upright & socially responsible individuals are the members of the Solidarity Youth Movement Karnataka. Let us rise to our responsibilities.

Rights, Justice and Morality

Today, we can see there's a stark violation of civil and human rights going on in our society. In the disguise of development, open loot of natural resources is taking place. Communalism is poisoning young minds and creating anarchy in society and we have no shortage of political racketeering that exploits the talents of the youth for their own selfish & petty goals. In addition to all these, unfortunately many human beings are still unaware of basic & important aspect of life, i.e. their purpose of existence in this worldly life and concept of emancipation, due to which immorality and wrongdoings is rampantly growing. In the above scenario, where injustice, inequality and corruption are rolling its juggernaut & mankind has forgotten the supremacy of Almighty God & his countless blessings, the youth cannot be a mere spectator. Resolute, creative & contributing youth is an utmost need of the time. As we go through the pages of history, we can see that youth were the crusaders of positive change and revolutions. They were the guardian of the justice and fraternity of society. They were the driving force of change in society. They were the ones who struggled to awaken the masses from ignorance towards truth & guidance. As evident, youth are capable of building a society on the basis of truth & non-violence. We need to strive today to form a society free from hunger, poverty, ignorance, inequality and to promote humanitarian values such as brotherhood, equality and coexistence. Hence youth are a ray of hope who can strive to give enduring solution to all these problems in the light of Divine guidance. Solidarity Youth Movement, Karnataka is moving forward in this regard by organising youth of Karnataka through its platform.

Youth Empowerment

About 70% of today's population in India is under the age of 40 years, which forms the important human resource of our country. Hence, it is necessary to create an atmosphere helpful for youth to develop their all-encompassing personality. But unfortunately, only about 3 to 4 percent of the GDP is spent by the government on human resource development through education & other means. UNICEF's 2019 report reveals that 47 percent of young people are unable to obtain sufficient skills & knowledge necessary to get qualified for employment even after completion of their formal education. It is a harsh reality that the vast majority of young people in our country are not financially sound. Under the present conditions of economic downturn, the numbers of unemployed youth are rising drastically day by day. Hence, Solidarity Youth Movement, Karnataka is continuously striving for all-round empowerment of youth in the areas of skills development, livelihood opportunities and entrepreneurship.

Youth for Balanced Development

Youth should refrain from both extremes of materialism and reclusiveness. They need to develop balanced thinking and work towards spreading hope & positive thinking and be sensitive to resolving existing issues around them. Solidarity Youth Movement, Karnataka seeks to build a responsible & mature society focusing on youth that proactively responds to all concerns & problems of society and try to address them in the light of Divine guidance. Solidarity through its platform is inspiring youth to work for the success in this world and Hereafter through their wholesome personality development. Additionally Solidarity strives to develop a culture of knowledge & critical thinking among youth.

Unity in diversity

India is a union of many states, languages, religions & culture. Uniformity is a threat to the celebrated diversity of our country. Unity in diversity is the unique feature of our country. At every 10 km, we find a different culture here. Multiculturalism is the lifeblood of our country. It is our glorious tradition to seek harmonious co existence in the plurality and diversity of our country. However It is equally true that some selfish interests are now aggressively attacking this Multiculturalism - the innate breath of our lives. There is a systematic work going on to sow prejudice, hatred and violence among youth. There is also an attempt to distort the actual history and present manufactured lies as truth. Speaking against intolerance has become a crime now and questioning the
